Improve your productivity with Integral View Port

Benefits of smart view port

1. Innovative cost savings. (Material cost)

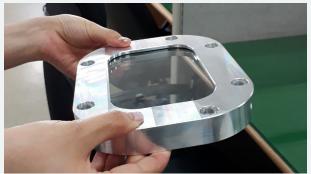

JKR040-G-A-V	JK160-G-A-V
Using: View port for sensor Standard Price: 55\$(USD) Case for Tempered Glass 70\$(USD) Case for quartz Special feature - Sensor fixed mounting tap provided The location of the tap can respond to customer requests - Same with ISO NW 40 interface	Using: View port for watching Special feature - Same with ISO NW 160 interface Standard Price: 170\$(USD) Case for Tempered Glass

2. Reduction of assembling time and part cleaning time / We provide bolt for assemble

Assemble working sequence before	Assemble working sequence with integral view		
1st: Find the parts you need for assembly. 2nd: Clean all parts including O-rings. 3rd: Prepare the assembly bolt. 4th: Proceed with assembly.	1st: Proceed with assembly.		

3. The assembly work can be done stably.

4. Simplify the BOM for your equipment.

BOM Before				BOM with integral view				
Level	Part number		Part name]				
4	TNG301-A2110-00A	TNG301-A2110-01A	View Port assy Window Housing		Level	Part number		Spec
4		TNG301-A2110-02A TNG301-A2110-03A			3	TNG301-A2110-00A		JK160-G-A-V
4		AS568-343	O-Ring Bolt		-	•	'	
	Management of at least 4 parts is required.					Managemen	nt just one purch	ase part

- BOM is simplified.
- Product quality control is convenient.

Provides the convenience of application of the product.

- 1. There is no need to change the design of the existing chamber.
- Integral viewport is provided according to the interface of the customer's chamber. (Within 48 hours after receipt of review request)
- We provide both 2D and 3D Cad data for our round and square viewports as standard.
- 2. It is also possible to supply special-purpose View Ports. Integrated viewport with shutter
- Equipment in use: High vacuum deposition equipment
- Special feature
- Shutter is SBB treated

NW63 (Sizes larger than NW63 are also available.)

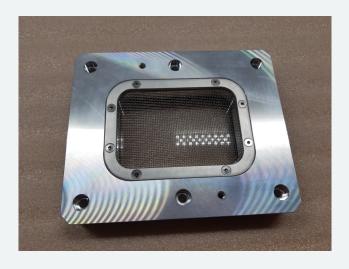

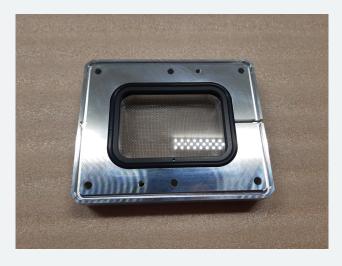

- 2.2 Integral View Port for Dry Etcher
- Equipment in use : Dry Etcher equipment
- Special feature

All surfaces in contact with gas are hard anodized.

The outside is equipped with EMI-Mesh.

The O-ring has an outer diameter of 5.33 and a hardness of 70 or more.

Major customers Since 2017

It has been used in various types of vacuum equipment since 2017 and has been verified by many vacuum equipment companies.
